

TEST REPORT

Applicant : K-Star Plastic Mold (shenzhen) Co., LTD
Floor 1-4, Building 2, Dongwangyang Industrial Zone, Huangtian Community,
Address : Hangcheng Subdistrict, Baoan District, Shenzhen City, Guangdong Province,
China
Manufacturer : K-Star Plastic Mold (shenzhen) Co., LTD
Floor 1-4, Building 2, Dongwangyang Industrial Zone, Huangtian Community,
Address : Hangcheng Subdistrict, Baoan District, Shenzhen City, Guangdong Province,
China
Sample name : Aromatherapy diffuser
Trademark : N/A
Model : KS2601, KS2602, KS2603, KS2601-01, KS2601-02, KS2601-03, KS2602-01,
KS2602-02, KS2602-03, KS2603-01, KS2603-02, KS2603-03
Model difference : All the models are the same, except for the model names and appearances.
Report Number : UTT202605296S
Date of Test : Jun. 01, 2026 to Jun. 10, 2026
Test Requested : Two hundred and fifty-three(253) substances in the Candidate List of Substances
of Very High Concern (SVHC) for authorization published by European Chemicals
Agency (ECHA) on and before Feb. 04, 2026 regarding Regulation (EC) No
1907/2006 concerning the REACH.
Test Method : Analysis was performed by ICP-OES, GC-MS(HS), HPLC-DAD-MS, IC, AAS,
UV-VIS.
Test Result(s) : Please refer to the following page(s)
Summary : According to the specified scope and evaluation screening, the test results of
SVHC are $\leq 0.1\%$ (w/w) in the submitted sample.

Test by : 

Review by : 

Approve by : 

Remark :

1. The chemical analysis of specified SVHC is performed by means of currently available analytical techniques against the following SVHC related documents published by ECHA:
<http://echa.europa.eu/web/guest/candidate-list-table>

These lists are under evaluation by ECHA and may subject to change in the future.

2. REACH obligation:

- 2.1 Concerning article(s):

Communication:

Article 33 of Regulation (EC) No 1907/2006 requires supplier of an article containing a substance meeting the criteria in Article 57 and identified in accordance with Article 59(1) in a concentration above 0.1% weight by weight (w/w) shall provide the recipient of the article with sufficient information, available to the supplier, to allow safe use of the article including, as a minimum, the name of that substance in the Candidate List.

Notification:

In accordance with Regulation (EC) No 1907/2006, any EU producer or importer of articles shall notify ECHA, in accordance with paragraph 4 of Article 7, if a substance meets the criteria in Article 57 and is identified in accordance with Article 59(1) of the Regulation, if (a) the substance in the Candidate List is present in those articles in quantities totaling over one tonne per producer or importer per year; and (b) the substance in the Candidate List is present in those articles above a concentration of 0.1% weight by weight (w/w).

- 2.2 Concerning material(s):

Test results in this report are based on the tested sample. This report refers to testing result of tested sample submitted as homogenous material(s). In case such material is being used to compose an article, the results indicated in this report may not represent SVHC concentration in such article. If this report refers to testing result of composite material group by equal weight proportion, the material in each composite test group may come from more than one article.

If the sample is a substance or mixture, and it directly exports to EU, client has the obligation to comply with the supply chain communication obligation under Article 31 of Regulation (EC) No. 1907/2006 and the conditions of Authorization of substance of very high concern included in the Annex XIV of the Regulation (EC) No. 1907/2006.

- 2.3 Concerning substance and preparation:

If a SVHC is found over 0.1% (w/w) and/or the specific concentration limit which is set in Regulation (EC) No 1272/2008 and its amendments, client is suggested to prepare a Safety

Data Sheet (SDS) against the SVHC to comply with the supply chain communication obligation under Regulation (EC) No 1907/2006, in which:

- a substance that is classified as hazardous under the CLP Regulation (EC) No 1272/2008.
- a mixture that is classified as hazardous under the CLP Regulation (EC) No 1272/2008, when it contains a substance with concentration equal to, or greater than the classification limit as set in Regulation (EC) No. 1272/2008; or
- a mixture is not classified as hazardous under the CLP Regulation (EC) No 1272/2008, but contains either:

- (a) a substance posing human health or environmental hazards in an individual concentration

- of ≥ 1 % by weight for mixtures that are solid or liquids (i.e., non-gaseous mixtures) or ≥ 0.2 % by volume for gaseous mixtures; or
- (b) a substance that is PBT, or vPvB in an individual concentration of ≥ 0.1 % by weight for mixtures that are solid or liquids (i.e., non-gaseous mixtures); or
- (c) a substance on the SVHC candidate list (for reasons other than those listed above), in an individual concentration of ≥ 0.1 % by weight for non-gaseous mixtures; or
- (d) a substance for which there are Europe-wide workplace exposure limits.

3. If a SVHC is found over the reporting limit, client is suggested to identify the component which contains the SVHC and the exact concentration of the SVHC by requesting further quantitative analysis from the laboratory.

Notes :

- (1) The table above only shows detected SVHC, and SVHC that below RL are not reported. Please refer to Appendix for the full list of tested SVHC.
- (2) RL = Reporting Limit (Test data will be shown if it $\geq$ RL. RL is not regulatory limit.)
ND = Not detected (lower than RL), ND is denoted on the SVHC substance.
- (3) * The test result is based on the calculation of selected element(s) and to the worst-case scenario.
** The test result is based on the calculation of selected marker(s) and to the worst-case scenario.

Calculated concentration of boric compounds are based on the total boron for liquid, powder and paste samples and water extractive boron for other samples by ICP-OES.

RL = 0.005% is evaluated for element (i.e. cobalt, arsenic, lead, chromium (VI), aluminum, zirconium, boron, strontium, zinc, antimony, titanium, barium and cadmium respectively), except molybdenum RL=0.0005%, boron RL=0.0025% (only for Lead bis(tetrafluoroborate)).

- (4) § The substance is proposed for the identification as SVHC only where it contains Michler's ketone (CAS Number: 90-94-8) or Michler's base (CAS Number: 101-61-1) $\geq 0.1\%$ (w/w).
- (5) Composite test has been performed in equal proportion for the components/material per client requested. And the result is calculated using the minimum sample weight.

Test Result: (Substances in the Candidate List of SVHC)

Specimen Description:

A#: Metal part

B#: Nonmetal part

Note:

1. -w/w=weight by weight
2. -RL=Reporting Limit. All RL are based on homogenous material.
-N.D.=not detected(lower than RL)
-N.C.= Not Conduct, because the product is metal, it can't have the organic compound, it needn't to be tested.
3. -0.1%=1000mg/kg=1000 ppm
4. -PBT=Persistent,Bioaccumulative,Toxic;vPvB=very Persistent very Bioaccumulative
5. -▲=An equivalent level of concern as exerted by CMR or,PBT/vPvB substances.
6. - *: Concentration value of Cobalt dichloride;Diarsenic pentaoxide;Diarsenic trioxide;Sodium dichromate; Lead hydrogen arsenate;Triethyl arsenate;Strontium chromate;Sodium chromic;Potassium chromate; Ammonium dichromate;Potassium dichromate;Cobalt(II) sulphate;Cobalt(II) dinitrate;Cobalt(II) Carbonate;Cobalt(II) diacetate;Chromium trioxide;Chromic acid,Dichromic acid,and Oligmers of chromic Acid and dihmomic acid;Dichromium tris(chromate);Potassium hydroxyoctaoxodizincatedichromate; Pentazinc chromate octahydroxide;Calcium arsenate;Trilead diarsenate;Arsenic acid; Lead dipicrate is calculated by conversion from the test results of tributyltins.
7. - **: All refractory ceramic fibres are covered by index number 650-017-00-8 in Annex VI of the Regulation on Classification, Labeling and Packaging of chemical substances and mixtures, the so called CLP Regulation(Regulation(EC)No 1272/2008).
8. - ***: C.I.: Colour Index
9. - ****:Light fractions from distillation
10. - *****: Concentration value of Disodium tetraborate,anhydrous and Tetraboron disodium heptaoxide, hydrate is evaluated by Disodium tetraborate,with no consider of the hydrate.
11. - In view of the substances are established as UVCB substances (substances of unknown or variable composition,complex reaction products or biological materials) consisting of different and variable constituents,the test results are calculated based on the main constituents of the representative compounds for substances.
12. - In view of the substances contain variable substances, the test results are calculated based on main constituents of the representative compounds for the substances,and the test results of the representative compounds are calculated based on the result of specified heavy metal elements.
13. -Concentration value of Boric acid;Disodium tetraborate,anhydrous;Tetraboron disodium heptaoxide, hydrate are calculated by the conversion form the test results of certain elements and confirmed by appropriate solvent extraction,meanwhile the book of materials is suggested to be checked for further confirmation.

Remarks:

- 1.As the concentration of above substance that identified is based on the worst case scenario. Further investigation is required for confirmation of the presence of the substance in the sample.
2. The report limit is evaluated based on the representative substances.
